ESTIMATE

2246

DATE

06/02/2022

DATE	ACTIVITY	DESCRIPTION	QTY	RATE	AMOUNT
	Aluminum Doors, Frames, and Windows	All references to right and left are from looking at the building while standing outside. All glass is 1" insulated clear glass. With an older building, break metal will be needed to give a nice finished look. How much will be needed is impossible to know until we get into the project. Costs will be discussed at that point and is not included in this estimate. All finish work outside of the break metal, done by others. Looking at the front of the building, starting on the right side. First Opening: We will supply and install a 2" x 4 1/2" frame. This will not have glass as the customer wants to fill it with some type of wood. The wood work done by others. Second Opening: We would need to make the rough opening about 2" to keep this one piece of glass. ** If we made this into 3 separate pieces there would be about a \$4,000 savings. The vertical mullions would be 2" wide.*** Third Opening: This is a 3070 RHR door with a small transom. Hardware on door will be a tubular pull with a panic bar inside and an external cylinder, door closer, threshold, sweep. Panic will need to be dogged during business hours.	1	79,715.62	79,715.62

THE INSTALLATION LABOR TO BE FREE OF DEFECTS IN THE MATERIALS AND WORKMANSHIP. THIS WARRANTY DOES NOT COVER DAMAGE FROM ABUSE, VANDALISM, OR ACTS OF NATURE. MATERIALS THAT ARE DAMAGED DUE TO THE FAILURE OF RE-INSTALLED DOOR HARDWARE WILL NOT BE COVERED UNDER THIS WARRANTY.

Fourth Opening:
This opening would be split into 3 pieces of glass. Vertical mullions 2".
Fifth Opening:
This is a 3070 LHR door with small transom.
Hardware on the door will be a tubular pull with a panic bar inside and an external cylinder, door closer, threshold, sweep. *** There was some discussion about controlled access on this door. Depending on what customers wants the cost ranges from about \$650 for a stand alone push button lockset to \$2,500 for a wifi controlled RFID card system. There are options in between. The quote reflects a basic keyed cylinder.***
Sixth Opening:
This opening would be split into 3 pieces of glass. Vertical mullions 2".
Seventh Opening:
This is a double 3070 door with left side inactive and right side active. Inactive side will have manual flush bolts to secure the door. The right side will have a latch bolt that will latch into the inactive door.

A 50% down payment is required to get materials into production. Once payment is received the lead time will be confirmed. Note this lead time may be different from original quote depending on business volume.

SUBTOTAL	79,715.62
TAX	0.00
TOTAL	\$79,715.62
