

Shakopee Youth Baseball Association

Request: For the City of Shakopee to allow installation of a batting cage at West Tahpah Field.

Details: Shakopee Youth Baseball Association (SYBA) would like to have a batting cage professionally installed on the 3rd base side of West Tahpah field on top of the current bullpen area. SYBA prefers the 3rd base side of the field for the batting cage because it is closer to Tahpah 5-8. In addition, the batting cage would be between the current West Tahpah field and the potential future 12-13 year old field that has already been graded. The batting cage would be a useful addition to that area of Tahpah. The structure will be 80' by 15' containing 1 cage that could be split into 2 smaller cages by the use of a center net. SYBA recommends building over the current bullpen and the 15' width to avoid the sprinkler boxes, electrical line to scoreboard and any regrading of the West Tahpah area. SYBA will pay the construction costs of the batting cage. The batting cage will be built with similar materials and colors as other cages we have built around Shakopee. See below for more information.

Locations: Below is the location of the cage.
