2030 Comprehensive Plan Review

Thank you for helping to craft the city's new comprehensive plan for the year 2040, Envision Shakopee. Your input will help staff and planning consultants design and organize the document, address issues and begin crafting policy language.

The first phase of the planning process, Community Understanding, included listening to the community, gathering input and analyzing data. As we move into the second and third phases, the plan will begin to get more and more specific. To begin crafting specific language for the 2040 Plan we are asking staff and elected and appointed officials to review the 2030 Plan.

This review form will help to guide your review of the plan. Constructive criticism and feedback of the 2030 Plan is encouraged as it will help to produce a more usable 2040 document. If you have any questions, please contact Eric Weiss at eweiss@shakopeemn.gov or 952-233-9347.

What about the 2030 Comprehensive Plan document works well?
What about the 2030 Comprehensive Plan document does <u>not</u> work well?
What is missing from the 2030 Comprehensive Plan (organization, analysis, graphics/maps, background information, vision, goals/strategies/tactics, issues, etc.)?

What could we do differently that will make the new comprehensive plan more useable, effective, and easy to read?

Thinking about implementation of the 2030 Plan, what do you view as the major accomplishments of the last ten years?

What issues still need to be addressed and should be carried forward into Envision Shakopee?

How could the plan be organized, designed or structured to better integrate the various planning elements (parks, housing, transportation, land use, economic development, etc.)
