

Shakopee BrewHall intends to use the patio as an extension of the BrewHall. The additional outdoor seating (with a total upstairs capacity of 30) will bring an extra element to our private party capabilities.

Being mindful of city and state requirements, the complete upstairs space is currently designed and licensed to support 30 total people. This number factors in both the business office space, as well as the patio space that the BrewHall is requesting to use. The total number (30) will be a blend of office space folks, as well as patrons on the patio.

Generally speaking, the business office space is: 7am-5pm. Hours for the patio will be: 3pm-close (10 pm or 11pm). In the event of overlap on hours, the BrewHall will reduce accessibility to the patio in light of the individuals working in their business office – i.e. second floor is never to exceed a total of 30.

Access to the patio will be the BrewHall's production facility. This access (or path) will enable customers to stay inside the establishment instead of having to go outside and through the backdoor facility entrance.

The BrewHall intends to have up to three kegs (5 gallons each) of beer on a mobile cart on the patio.

Regarding customer experience/entertainment, the BrewHall intends to have a few televisions and a couple speakers mounted for playing music. Sound levels will be minimal to average, only for background noise and listening to sporting events, etc. Again, entertainment hours will coincide with the open hours of the patio.
