

NOTES:

- Building wall size: 54 ft. w x 24 ft. h.
- Mural design has been scaled down to approximately 12%.
- The design is meant to be interactive and we hope the viewer takes a photo of themselves "swinging". Adults will stand on the street and squat to give the indication of swinging. There is a 9.5 in. high curb at the base of the wall (don't have the depth, but guessing 9-12 inches deep) where the kids can stand for easier access to the swing. (See photo at right for reference.)
- All measurement may not be to scale or 100% accurate as they were taken via a tape measure (some areas we could not reach and used our best guess). The measurements in the photo at right are exact measurements for placement of the swing.
