Reg: Variance to extend a permanent garage structure closer than the 10' minimum to property line requirement.

Dear City of Shakopee, I am asking you to grant me this variance to extend my permanent garage closer to the property line to enable me to park my F350 in a garage. I currently have a wife and two children that are involved in many sports and school events. We have to have two vehicles large enough to transport our kids, their gear and other kids to these events. Due to our current garage size, we are unable to fit both vehicles inside. I would like to build a third stall on the garage extending 12'X25'. This would put me 7.5' from the edge of my garage wall to the property line. The hip roof would be extended to match what is there. Myron Anker my neighbor to the west where the addition is fine with the addition and would sign off if that would help.

Thank you,

Jeremy Gylland
