Comments

The annual EnerGov SaaS fee is inclusive of the following: full access to the software licenses, full technical support, software maintenance including all updates/releases to the software, 3 environments via Tyler Hosting (testing, training, and production), comprehensive management of all application hosting, full management of the operational infrastructure/servers required for the application, and built-in disaster recovery.

EnerGov e-Reviews requires Bluebeam Studio Prime, at an estimated yearly subscription cost of \$2,400/100 users. Further pricing detail is available by contacting Bluebeam Sales Support Representative - Bridget McConkie at bridget.mcconkie@caddmicrosystems.com or 410-637-3861.

Professional Implementation Services based on Tyler's Rapid Deployment methodology, which formats 90% of the City's processes into the EnerGov's Best Management Template configuration. The pre-defined and pre-configured automation that is standard in the EnerGov application will be provided.

Data Conversion Services based on Tyler's EnerGov template database approach from one historical source (LOGOS).

EnerGov includes standard reports, personalized dashboards and search/query tools for ad-hoc report creation. Tyler will work with the agency to assess any required custom reports. These custom reports can either be developed by the agency, or the agency can purchase Tyler's custom report development services.

Tyler offers a family of EnerGov SDK/APIs (priced separately) that allow an agency's IT staff or system integrator to build integrations between EnerGov and 3rd party systems. This proposal includes the EnerGov Content Management API for integration with LaserFiche. Tyler does not provide integration development services with the purchase of these SDK/APIs.
