Project # Sewer-20-003

Project Name Sewer Service Lateral Pipe Rehabilitation

Accounting Code 5872/6872

Fund Sanitary Sewer Fund

Description

Total Project Cost: \$650,000

This project constructs a new cured-in-place liner inside sanitary sewer services located along sewer mains that have been lined.

Justification

Sewer services in the project area vary in age, pipe material and condition. Most are approaching their life expectancy and pose a high risk of collapse or blockage. The sewer main in the project area was previously lined and the bituminous street is not in need of repair. This project continues with the rehabilitation of the City's infrastructure in the older sections of the Community.

Expenditures	2020	2021	2022	2023	2024	Total
Construction/Maintenance	550,000					550,000
Engineering/Administration	100,000					100,000
Total	650,000					650,000

Funding Sources	2020	2021	2022	2023	2024	Total
Sanitary Sewer Fund	650,000					650,000
Total	650,000					650,000

Budget Impact/Other

Lining of sanitary sewer service pipes from the sewer main to behind the curb and gutter significantly lowers the potential for a collapse or blockage that would require costly open excavation and repair of the street.
