

SYHA Shooting Room

PROPOSAL *APPROVED BY THE BOARD

We will be using Becker Arena Products during the install. Becker has done a great job making our arena look top notch since the beginning.

Floor

We will install, maintain the shooting tiles thru the whole space.

WALLS

We will have shooting tarps on the North and possibility the West wall. The East wall is concrete and will put our logo and paint. The South wall we will build a protective wall secure and hide the plumbing features.

We will also be building a wood wall around a Gas pipe in the North East corner.

The wall will wither be 2x4 construction in compliance from the fire marshal with 2 Metal access doors. Painted to blend in.

Or a Chain Link Fence with a screen to hide the plumbing features.

Netting will be similar to the picture. It will be 10 ft high, protecting the ceiling and also have shooting lanes for the players to shoot or stick handle.

A Shooting Room is key for our association to allow kids to learn and develop better hockey skills. Developing hockey skills is key for all kids, especially at the ages of 10 and higher as that is when the cognitive development triggers learned behaviors. We will have kids use this space daily during the season as well as the off season. Also having better tools like our great facility, shooting room, dryland, Top Dog and MPH will also help families possibly pick Shakopee as a place to live. Our goal as SYHA is to create better skilled hockey players so our High School can compete within our district. While also developing young men and women to be polite, time management, helping, caring individuals as they move through their development.

This room will roughly run around \$20,000 which will be paid for by SYHA from our fundraisers, and pull-tab profits.

Existing Room:

Rink 2 – former turf storage room

Change from under-utilized, to highly active with Shakopee hockey teams
