
TREES LOCATED AND TAGGED BY REHDER FORESTRY CONSULTING

City of Shakopee Tree Preservation Requirements-
Definitions

Rehder Forestry Consulting

Common Tree- Any of the following trees: poplar, red maple, elm, cedar, mulberry, balsam fir, birch, pine, spruce, tamarack, black locust, or other fast growing deciduous tree not listed as an exceptional tree. Trees that are not included in overall tree inventory and are not required to be replaced are ash, buckthorn, willow, fruit trees, and cottonwood

Significant Tree- means a living specimen of a woody plant species that is either an Exceptional Tree whose diameter is 4 inches or greater DBH; a Common Tree whose diameter is 6 inches or greater DBH, or a Multi-stem Tree with two or more stems measuring 4 inches or greater in diameter measured above the root collar.

Exceptional Tree- Is considered any of the following trees; oak, hickory, basswood, sugar maple, black maple, cherry, catalpa, walnut, hackberry, hornbeam, coffeetree, butternut, buckeye, or horse chestnut.

High Priority Tree- An exceptional tree 20 inches DBH or greater, or any tree the City has a strong desire to preserve and is declared healthy by the city staff.

Multi-stem Tree- is a group of trees that share both a unified crown and common root stock. The diameter is recorded as the Diameter at Root Collar.

Tree Locations are in Scott County US Survey Feet

Multiple-stem trees are represented in the notes section. For example, 2x 18 16, is a 2-stem tree with respective diameters of 18 and 16 inches. Stem diamters are added together for a cumulative diameter

City of Shakopee requires inventory of trees near property lines that could be impacted by construction. Trees that fit this criteria are included in the spreadsheet but were not tagged and have a "0" in the Tag column

Species	Sp Type	DBH	Tag	Status	Disposition
Cherry, black	Common	10"	1		
Elm, Elm	Significant	Dead	13		
Elm, Elm	Significant	10"	8		
Elm, Elm	Significant	10"	10
