**Subject:** Proposal Review - MVTA Comments

17023  
MVTA

Tami and Kyle –

Thank you for the opportunity to review both the Amcon Construction and Topaz Investments proposals. Please see my comments below.

For the Amcon Construction project (caselog # 17023), MVTA supports the pedestrian infrastructure included in the plans to connect residents to Vierling Dr. MVTA has local bus service along Vierling Dr (Route 497) that provides service to Downtown Shakopee and the Marshall Road Transit Station. Currently, this portion of Vierling Dr is only served by Eastbound trips, meaning riders would need to ride a Westbound trip to Town Square Mall before continuing on to the proposed development site. If there is interest from the developer to include service in both directions, please let me know and we can review it further.

Regarding the Topaz Investments proposal (caselog # 17029), the plans don't identify a pedestrian connection to the sidewalk along Hwy 101 from the proposed buildings. MVTA recommends that sidewalk connections within the site are included to provide access to local bus service at the intersection of Marshall Rd and 1<sup>st</sup> Ave/Hwy 101.

Please let me know if you have questions on any of my comments. Thank you.
